

Tie Angle

This accessory is designed to be placed along the perimeter of the walls of areas where overhanging ceilings are to be built from Panel Rey plaster panels. Tie angles are used to firmly attach overhanging ceilings to walls and on occasions they form an auxiliary reinforcement in some ornamental details of walls and ceilings.

Dimensions (in)

Wing B	Caliber	Wing C	Nominal Length L
≥ 1.000	26	≥ 1.000	± 1/8
